

INSTITUTE OF ENGINEERING & MANAGEMENT, KOLKATA
SALT LAKE

(Affiliated to UEM Kolkata and Approved by AICTE)

DEPARTMENT OF ELECTRICAL & ELECTRONICS ENGINEERING

ELECTRICAL AND ELECTRONICS MEASUREMENT LAB

PAPER CODE: PCCEEE493

List of Assignments:

1. Simulate the same short transmission line in MATLAB Simulink and compare efficiency with the hardware result.
2. Design a low pass filter using capacitance value from experiment No.5
3. Calculate the power factor of your residential building using your household energy meter.
4. Calculate the load factor using load data of any electricity board. Use Load data for a period of 1 hour. Also calculate demand factor and diversity factor using historical data.
5. Provide pictorial representation of your various cut sections of components like PMMC, dynamometer and single-phase disc type energy meter.
