

DEPARTMENT OF ELECTRICAL AND ELECTRONICS ENGINEERING

Subject Name: ELECTRICAL MACHINES LABORATORY-I

PAPER CODE: PCCEEE491

ASSIGNMENT:

Q1. Design an air core transformer using MATLAB

Q2. Design a 3phase, 50 Hz, 500 KVA, 33/11KV transformer connected to a resistive Load of 200 ohms in MATLAB Simulink.

Q3. Write the applications of following transformers:

(i)Power Transformer, ii) Distribution Transformer, iii) Instrument Transformer, iv) Isolation Transformer, v) Auto Transformer, vi) Pulse Transformer, vii) Audio Transformer

Q4. What is the IEC standard for dry type transformer?

Q5. Machine Modelling of DC traction Motor using MATLAB/Simulink for locomotive application.

Q6. Machine Modelling of DC generators with different excitation systems using MATLAB/Simulink

Q7. To perform speed control of dc motors using MATLAB
