

Degree: B.Tech, Stream: EEE

Fourth Semester Assignment,

Faculty Name: Prof. Dr. Manas Mukherjee

Subject Name: Electrical & Electronics Measurement

Faculty Name: Prof. Dr. Manas Mukherjee

Full Marks: 50

13*2=26

Group A

1. What is creeping in energy meter?
2. What is meter constant in energy meter? Write it's unit.
3. What are errors in energy meter?
4. Establish balance condition for a Wheatstone Bridge.
5. What is over compensation in energy meter?
6. Why lag adjustment is needed in energy meter?
7. What is the advantage of Maxwell- Wein's Bridge?
8. Derive expression of braking torque in energy meter.
9. Explain phase angle error in single phase energy meter.
10. What are the advantages of Anderson Bridge?
11. How creeping is prevented in single phase energy meter?
12. Obtain balance condition of Maxwell's Bridge.
13. Obtain balance condition of Maxwell – Wein's Bridge.

2*12=24

Group B

1. Describe the principle of single-phase disc type energy meter with diagram and mathematical equation.
2. Derive driving torque equation of single-phase disc type energy meter.
