

Assignment 1

Subject: Internet of Things

Subject Code: OECCEEE601A

1. List all the various IEEE 802.15.4 frame types.
2. List five physical quantities that the transducer measures
3. Define signal conditioning. Explain signal conditioning with the help of block diagram of mechatronic system.
4. Explain how the MQTT protocol works with a suitable diagram.
5. Define electrical transducer. State its two advantages compared to other transducer.
6. Describe all the CoAP message types with the help of a proper diagram.
7. Draw the block diagram of the Measurement System and explain each block.
8. Explain how the XMPP protocol works with a suitable diagram.
9. Compare and contrast between primary and secondary transducer
10. List five major factors to be considered while selecting a transducer
