

Assignment 2

Subject: Internet of Things

Subject Code: OECCEE601A

1. An ac LVDT has the following data:
Input=6.3 V, Output=5.2V, range +/-0.5 in. Determine
(i) Calculate the o/p voltage vs core position for a core movement going from +0.45 in. to -0.30 in.
(ii) The output voltage when the core is -0.25 in. from the centre.
2. Describe in brief about Thermocouple with necessary diagrams. Mention the types of Thermocouple and their characteristics.
3. Derive gauge factor of a strain gauge.
4. Formulate the logical design of IoT with explanation.
5. Describe Protocol software and table access routines in an IoT.
6. Explain the major challenges while designing WSN (Wireless Sensor Network).
